

Don't know what to do with your Recovered Refrigerant Oil?

Brought to you by **A-GAS®**

Do you recover oil from refrigeration systems during service or decommission work?

If yes, the oil disposal service available from A-Gas wholesale partners will help you dispose of this recovered oil responsibly.

Our oil disposal service provides you with an empty 10L container*. Simply fill it with recovered refrigerant oil** and return it with your hazardous waste note.

Features and Benefits:

- A convenient and portable 10L container*
- Each container comes with a venting cap to ensure the refrigerant absorbed in the oil does not cause the plastic to expand
- An all-inclusive price – know how much your oil disposal will cost from the outset
- No associated cylinder charges
- Provides an environmental solution for Hazardous Compressor Oil

* Alternative Container Sizes Available

** Not suitable for oils containing CFCs or Ammonia
