## AMERICAS

### Company Announcement

To our Valued Customers,

Due to the ongoing and adverse weather conditions in Texas, our Magnolia plant will be closed temporarily. Protecting the safety and well-being of our employees is our number one priority. There is still considerable risk in this area due to localized flooding.

In addition to our plant closure, products that enter through the Port of Houston will be delayed until further notice. Once access to the port can be gained, we will assess all property and make arrangements for delivery as soon as possible.

We appreciate your business and will continue to monitor the situation and provide you with updates as they become available.

Mike Armstrong  
Chief Operations Officer
